

PORTLAND – Just past Mt. Hood and a good bit south is the Bend, Oregon golf mecca on the eastern slope of the Cascade Mountains. Be careful driving as you may come upon the burntout, 80 year old hippie still driving his VW bus at what he envisions to be warp speed, but in actuality is closer to 20 MPH. This section of the range has mountains that are part of the Pacific Rim of Fire. Mt. St. Helens relieved herself recently, if you consider this lifetime as being recent.
